

Varimixer

AR200

STRONG AND EFFECTIVE The powerful motors have the capacity to handle large quantities of heavy ingredients.

HYGIENIC AND EASY TO CLEAN All surfaces and accessories are made of stainless steel, and the design ensures the best possible hygiene and very easy cleaning. Varimixer AR200 can be washed in accordance with the IP53 standard, and can be upgraded to either a marine version or IP54 cleaning, with a waterproof stainless steel mixer head.

VARIABLE SPEED CONTROL The speed is variably controlled by a very rugged system of belts, rather than gears. This solution means that the mixer does not contain oil, thus avoiding the risk of oil spilling into the bowl.

REMOVABLE SAFETY GUARD The removable safety guard is made of CE-approved plastic and is easy to attach and dishwasher safe. Varimixer AR200 can also be fitted with a sealed stainless steel guard which protects against dust and splashing.

AUTOMATIC FIXATION The bowl is wheeled into place between the two bowl arms. Using the handle – or automatically by pressing a button – the bowl is lowered or raised and locked in place in a single movement.

EASY BOWL HANDLING Choose between bowl trolley for transport or an electric bowl lift, which handles transport to and from the machine and all bowl lifts. This also ensures good ergonomics during filling and emptying. Choose between several models.

STAINLESS STEEL An easy-to-clean design. The AR200 comes as standard with completely stainless steel frame.
