

# I-SERIES OPTIONS

The I-series is a very quiet, reliable and powerful rack oven, built to be safe for use in an industrial environment with high production capacity and that can be loaded quickly and easily on a single occasion without having to rotate the platform. The oven's unique steam system, consisting of two combined and well-tested systems, is extremely powerful with a highly efficient steam capacity. The combination of the oven's designed air flow system and a rotating rack provides extremely even baking results.

## OPTIONS IN THE I-SERIES

### 1. Extractor hood

A large, solid extractor hood made of stainless steel. Effectively catches heat and steam when the oven door is opened.

### 2. Extractor hood with extractor fan

The extractor hood above is equipped with a fan for better steam extraction. Activated when the door is opened.

### 3. AES – Automatic Evacuation System

AES evacuation system improve the work environment at the bakery. A fan extracts the hot air and steam from the oven each time the door is opened.

### 4. Fully assembled oven

The oven is delivered preassembled, making installation easier. Preassembled oven may require special transport.

### 5. Sveba Connect Cloud Solution

A cloud service solution that allows complete control of baking 24/7, from any hardware and any location in the world.

### 6. Water filter

An effective filter that filters out dirt and limescale deposits, which gives the oven a longer life. Also gives the products a better taste and aroma.
