

CHINESE STEAM BUN SHAPING DEVICE NU032

Encrusting Machine Peripheral Equipment

This CORNUCOPIA optional device will automatically form creases on top of the Chinese bun, making it look hand made. Easy production of uniform high quality Chinese bun.

Two available types: "Folding" and "Folding & Twisting". Folding and Twisting can be turned on and off separately. It is also possible for products to bypass Folds and Twists.

Number of crease can be adjustable (9, 12, 18 and 24) . *There are two ways to adjust the number of creases; either by changing the entire folding unit or by removing some blades from the unit. ☒ Common parts include 12 and 24 creases and 9 and 18 creases.

Dedicated folding parts enable forming creases with dent on the center-top of the product. It is perfect for small products hard to twist (50g or less).
