

### CM-A30A, A30B, A36A, A36B, A22A Fully-Automatic Dough Divider & Rounder

CHANMAG CM A30A, A30B, A36A, A36B, A22A Fully Automatic Dough Divider & Rounder is designed to divide dough and round automatically and equally. Simply insert your rounding plate with dough into the machine.

It can help you to save time and it's easy to operate. This allows you to create different types of rolls with varying weight ranges and sizes in the same machine as well as facilitate easier cleaning and maintenance

#### Technical Features:

1. Hydraulic system to control operation by program
2. Rounding pressure & rounding timer can be adjusted
3. Increase rounding radius for better rounding quality
4. Larger base to help with more stability
5. Rounding tray is made material with static electricity treatment
6. Machine is required to start running by 2 hands at that same time in order to protect users from cutting by machine
