

Varimixer

AR 100

STRONG AND EFFECTIVE

The powerful motors have the capacity to handle large quantities of heavy ingredients

VARIABLE SPEED CONTROL

The speed is variably controlled by a very rugged system of belts, rather than gears. This solution means that the mixer does not contain oil, thus avoiding the risk of oil spilling into the bowl.

MULTIPLE CAPACIES IN ONE MACHINE

Bowls and tools are available for production of both 100, 60 and 40 liter.

DIGITAL TIMER

operation time can be controlled or monitored via a digital timer. The machine stops at 00:00

REMOVABLE SAFETY GUARD

The removable safety guard is made of stainless steel and is easy to remove and dishwasher safe.

AUTOMATIC FIXATION

The bowl is wheeled into place between the two bowl arms. Using the handle - or automatically by pressing a button - the bowl is raised, centered and locked in place in a single movement.

EASY BOWL HANDLING

Choose between bowl truck for transport or an electric bowl lift, which handles transport to and from the machine. This also ensures good ergonomics during filling and emptying. Choose between several models.

WHITE OR STAINLESS STEEL

An easy-to-clean design. The AR series is powder coated as standard and can be upgraded to a completely stainless steel frame.

The capacity chart shows the maximum capacity for the specific machine. The testing has been conducted with standard equipment. Therefore, the use of special tools can result in a different outcome. Always start the machine at the lowest speed. Increase the speed subsequently, taking the product being mixed into account.

Symbols explainer - Recommended actions:

- ✦ = Apply scraper, for the best and most efficient result
- = Always make sure the ingredients are room temperature/soft. If not, this can damage the tools
- = Recommended to work on low speed
- = Recommended not to go above medium speed.
- AR = Absorption Ratio (moisture in % of dry matter)
