

CORNUCOPIA CN511

Encrusting Machine Single Row model

From One Supplier

• SALES • SERVICE • SPARE PARTS

High-quality products with no damage to ingredients can be made using the specialized feeding mechanism for bread dough. CN511 is designed especially for "Filled bun" & "Filled doughnut". 60 pcs./min(max.) production speed. Product Weight Range is 10 – 250g

This device contains a mechanism suitable for fermented dough, allowing for the production of high-quality bread. The durability has been improved as well by reducing the heat generated by the machine. Production can be continued smoothly for long periods of time.

High-quality products with no damage to ingredients can be made using the specialized feeding mechanism for bread dough. Also, only a small amount of dough remains after production, and the system is easy to assemble and disassemble.
