

COMPACT PANNER KP242

Enrusting Machine Peripheral equipment

From One Supplier

• SALES • SERVICE • SPARE PARTS •

Rheon's new Compact Panner features a built-in underneath conveyor which indexes trays and receives foods produced by Rheon single-headed encrusting machines, lining them up evenly. The complete pick-up system has been automated in order to keep the product's shape intact.

The Compact Panner can memorize up to four panning patterns, allowing for a simple production changeover with a single switch.

With the easy-to-use operations panel, various options like panning belt speed, panning mode and panning position (with an adjustment timer) can be handled.

Panning Pattern

Uniform tray format

Staggered tray format

Panning Mode

Continuous Shuttling

Arranges products in a row in one continuous motion

Max. 10 shuttles/min (Supports 100 pcs./min*)
*Depends on panning pattern

Intermittent Shuttling

Places products one-by-one

Max. 60 pcs./min
