SET PANNER KP302

Enrusting Machine Peripheral equipment

From One Supplier

• SALES • SERVICE • SPARE PARTS •

Automatically arranges products made by CORNUCOPIA on baking trays. Offers not only higher productivity but also deformation-free and hygienic operation without any manual contact with products.

Further space-saving compact design by combining "Panner", automatic arranger, and "Tray Feeder". Panning modes are selectable from Intermittent or Continuous shuttling to suit your production.

Two different-sized trays can be used by resetting the Tray Feeder width.

KP301 : 420mm – 540mm (panning direction) x 380mm – 500mm (tray flow direction).

KP302 : 490mm – 660mm (panning direction) x 380mm – 500mm (tray flow direction).

Because the water-washable models allow the machine body to be washed with water, they are more hygienic to use. *Not compatible with high-pressure washers. Also, the control panel is not waterproof.
